- 13.

Information is that which informs. In other words, it is the answer to a question of some kind. It is thus related to data and knowledge, as data represents values attributed to parameters and knowledge represents understanding of real things or abstract concepts.[1] As it requires data, the information's existence is not necessarily coupled to its content. At its most fundamental level, information is any predication of cause and effect.

Our world will change more in the next 20 years than in the previous 300 years

The future is no longer an extension of the present!

Technology will be virtually
unlimited within a decade*

The rise of smart software and networked, 'intelligent' machines represents a tidal shift in our society

It could be heaven or it could be hell...

Exponential Change

DATA every-where/thing
CLOUD everything
SMART everything
CONNECTED everything
COMPUTE anything
MAKE anything
TRANSACTION anything
SEE everything

1 2 4 8 16 32 64 128

Data is the new Oil. AI is the new electricity. The IoT is the new nervous system.

Quantum computing will be the super-charger for AI and IoT (ETA: 3–5 years)

Defining AI

“AI is the science and engineering of making intelligent machines” (John McCarthy)

AI is not ‘a technology’

AI: Computer systems that turn information and data into KNOWLEDGE

(Demis Hassabis, CEO, DeepMind)

#GlobalBrain

“Machine learning is the science of giving computers the ability to learn and find insights without explicitly programming the machines on what to do”

**“Deep learning applications recognize patterns, optimize for outcome and make a decision.
Most deep learning models are based on the concept of neural networks” (Kai-Fu Lee)**

● ALPHAGO
01:38:49

The image features three lightbulbs arranged horizontally against a dark blue background. Each lightbulb has a white base and a glowing filament. The first lightbulb on the left is yellow and contains the letters 'IA'. The middle lightbulb is orange and contains the letters 'AI'. The third lightbulb on the right is red and contains the letters 'AGI'. A vertical red line separates the middle and right lightbulbs. Below each lightbulb is a line of text.

to me

Hey, Wynton Marsalis is playing this weekend. Do you have a preference between Saturday and Sunday?

-S

I'm down for either.

Let's do Saturday.

I'm fine with whatever.

The low-hanging fruit: smart everything, everywhere, anytime (IA)

The background is a dark, textured field filled with intricate, glowing blue and teal patterns. These patterns consist of interconnected lines, dots, and geometric shapes, resembling a complex network or a molecular structure. The overall effect is one of depth and complexity, with the patterns appearing to float and shimmer in a dark space.

Real or not?

The vast promises of AI: understanding, imagination, intuition and wisdom required!

? REAL ?

AT THE CUSP OF THE 5TH INDUSTRIAL REVOLUTION

Recent rapid adoption and application of artificial intelligence algorithms — triggered by access to big data and better hardware-processing capabilities — are changing the face of blue and white collar jobs.

REAL

Generally intelligent machines: Don't mistake a clear view for a short distance!

(Paul Saffo)

Poll #1

**Do you believe that AI could
become an existential threat?**

Humans and Machines

Humanity Technology

How computable are we?

Data and Information
is not Knowledge*
is not Understanding
is not Wisdom
is not Purpose

Commerce is driven by data, but MEANING is created by humans!

Algorithms

**“When it comes to really
important decisions
data trumps intuition
every time”**

Androrithms

**“All of my best
decisions in
business and life
have been made
with heart, intuition,
guts... not
analysis”**

The background is a dark, textured field filled with a complex network of glowing blue and teal lines and dots. These elements form various geometric shapes, including triangles and polygons, and some appear as thin, wispy trails, suggesting a digital or molecular structure. The overall effect is one of dynamic connectivity and data flow.

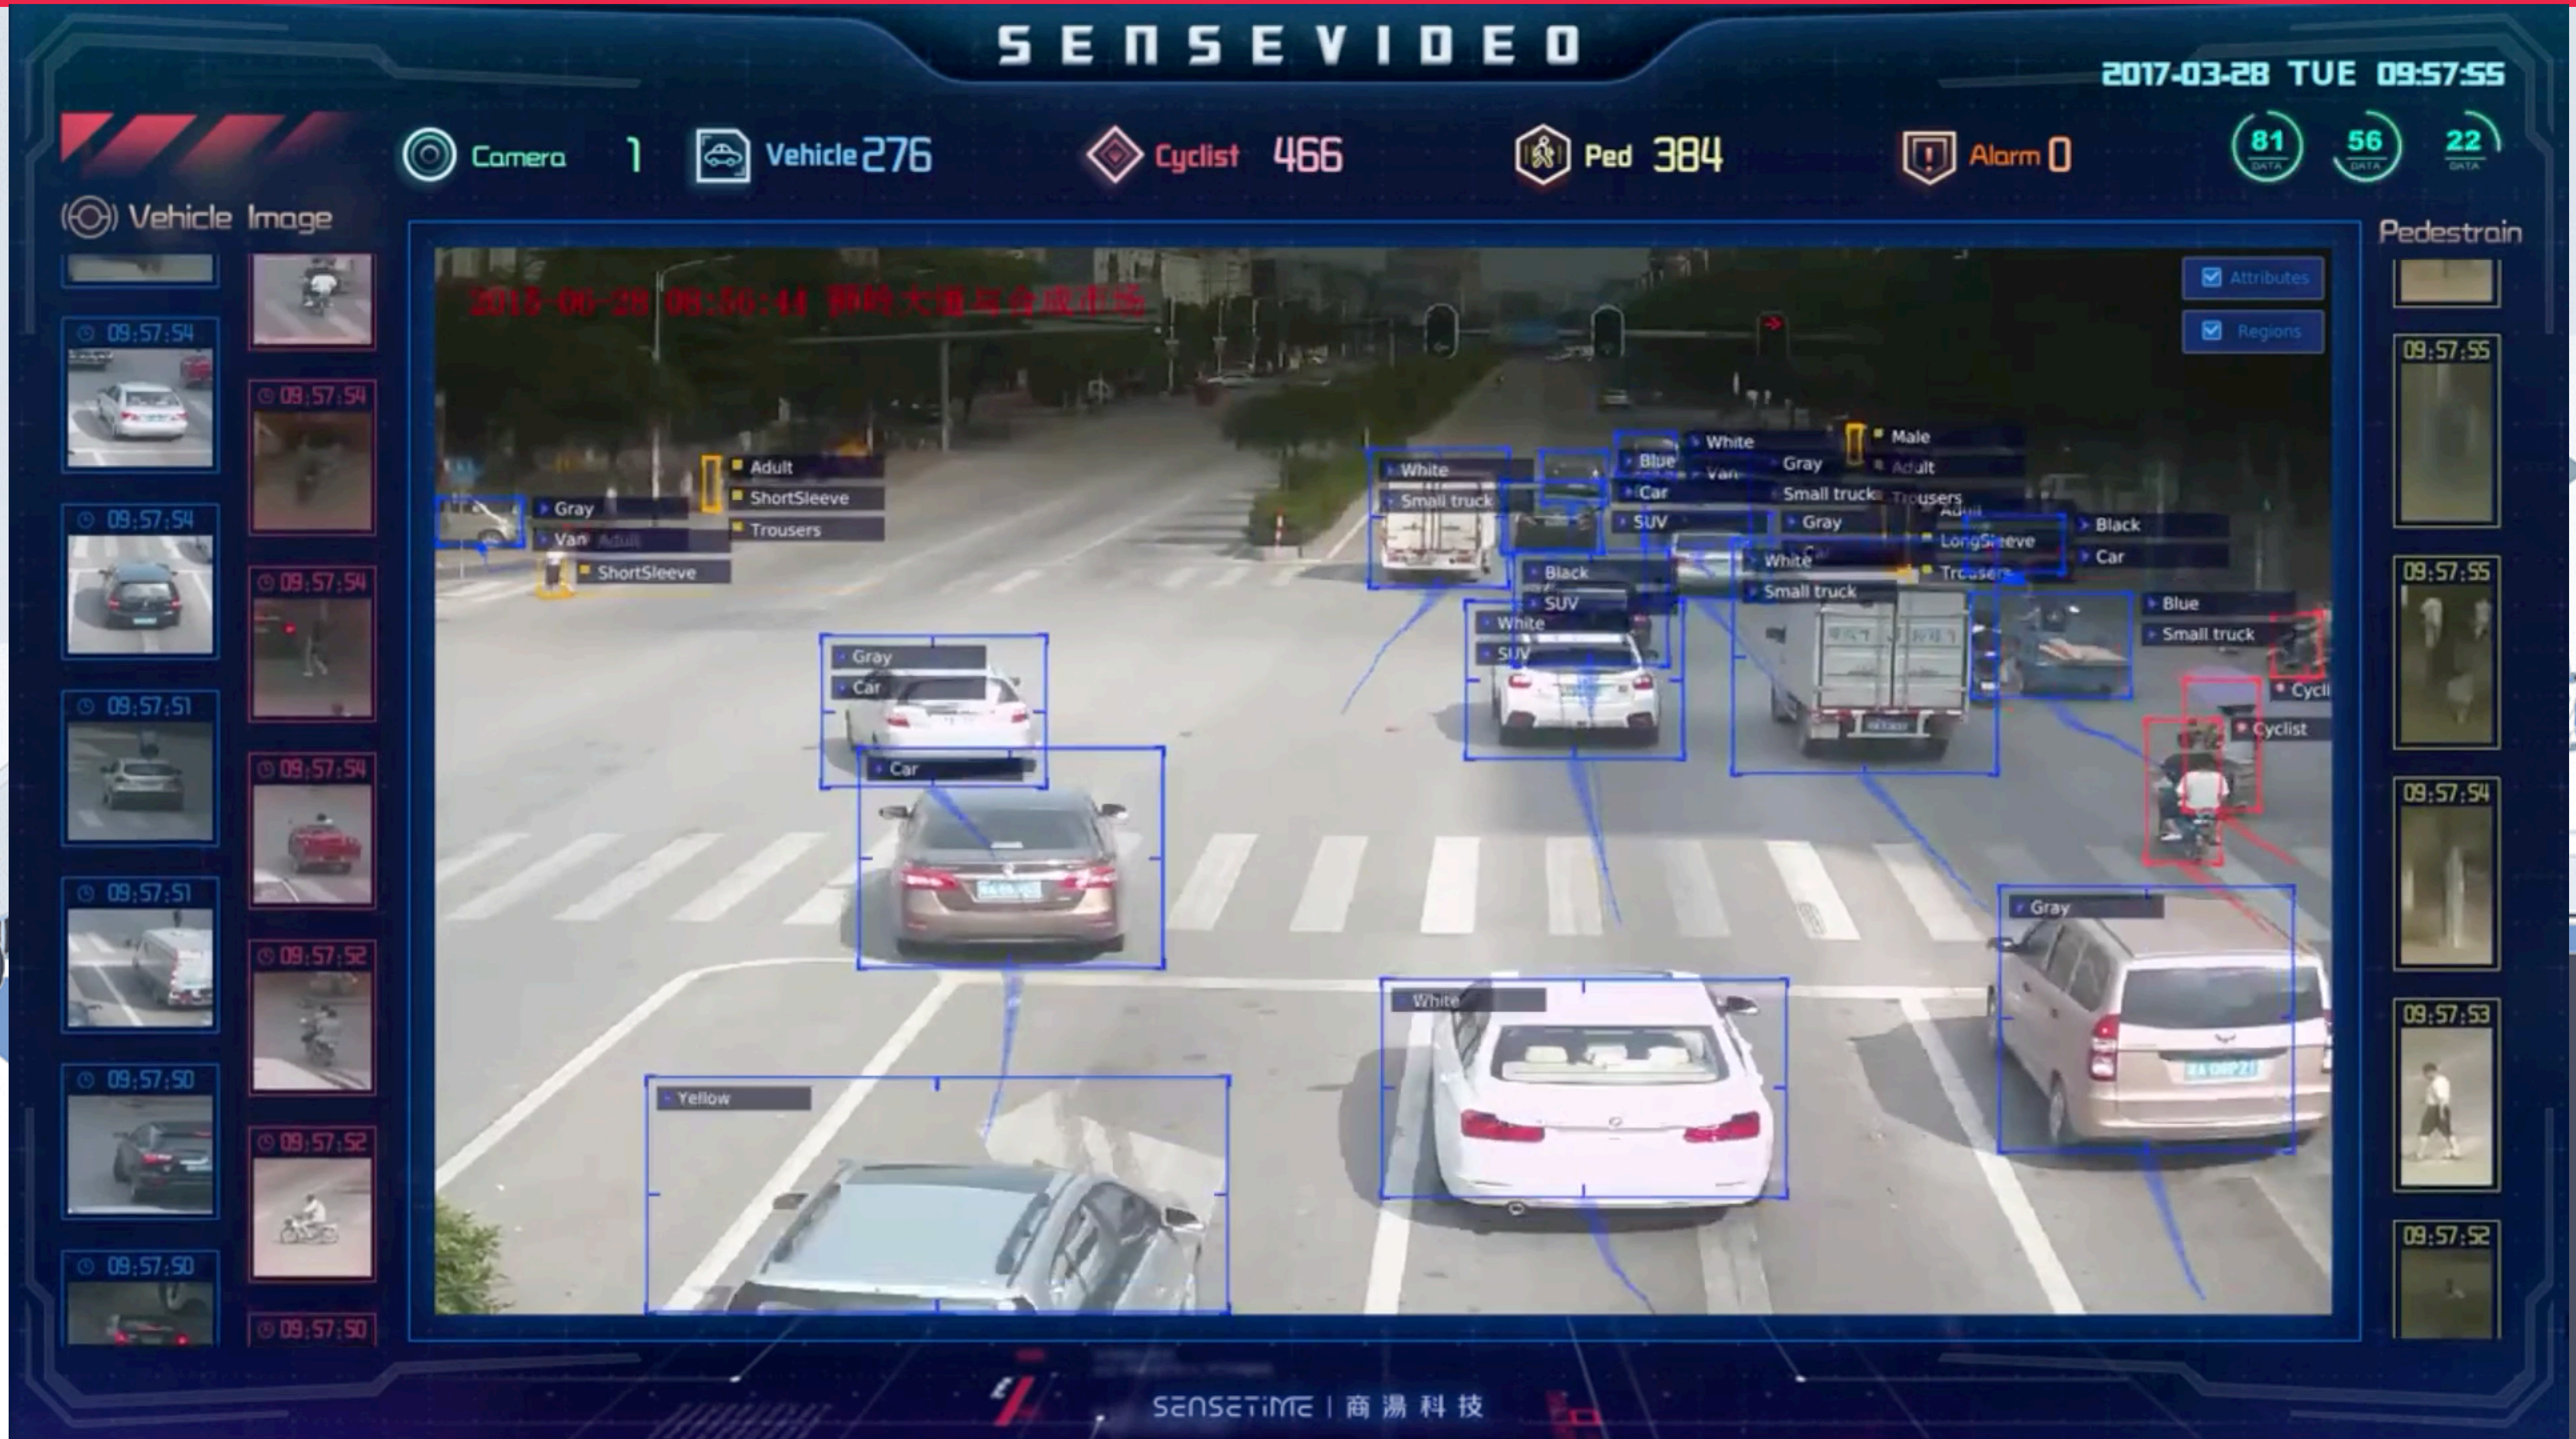

Digital Ethics

"Ethics is knowing the difference between what you have a right (or the power) to do and what is the right thing to do"

adapted from Potter Stewart

Technology is morally neutral – until we use it

CITIZENS WANT GOVERNMENT TO USE **ARTIFICIAL INTELLIGENCE** TO DELIVER NEW, IMPROVED SERVICES

EVERYTHING

EVERYWHERE

EVERYONE

Humanity ☯ Technology: where to draw the line?

“Technology can do great things, but it does not WANT to do great things. It does not want anything.”

Tim Cook, CEO, Apple October 25 2018

Defining a sustainable balance between humans (HI) and machines (AI) will be crucial!

Why?

Who?

DIGITAL ETHICS: the difference between doing whatever technological progress will allow us to do, and putting human happiness and societal flourishing first at all times

As everything moves into the cloud and governments will use AI everywhere, the more TRUST becomes essential

Poll #2

**How do you think AI could be kept
ethical and beneficial for everyone ?**

AI and the future of work, jobs, education

Anything that can be digitized or automated, will be: the end of routine is near!

R O U T I N E

But anything that **cannot** be digitized or automated will become much more valuable!

The future of human work: upskilling, reskilling, life-long learning...

#digialethics

The future is better than we think – if we design it wisely!

Poll #3

What is the most important benefit that AI could bring to your government and your nation in the near future?

Reminder: Technology is exponential but humans are not *

Strong leadership in digital ethics will be a key competitive advantage

AI at Google 7 principles

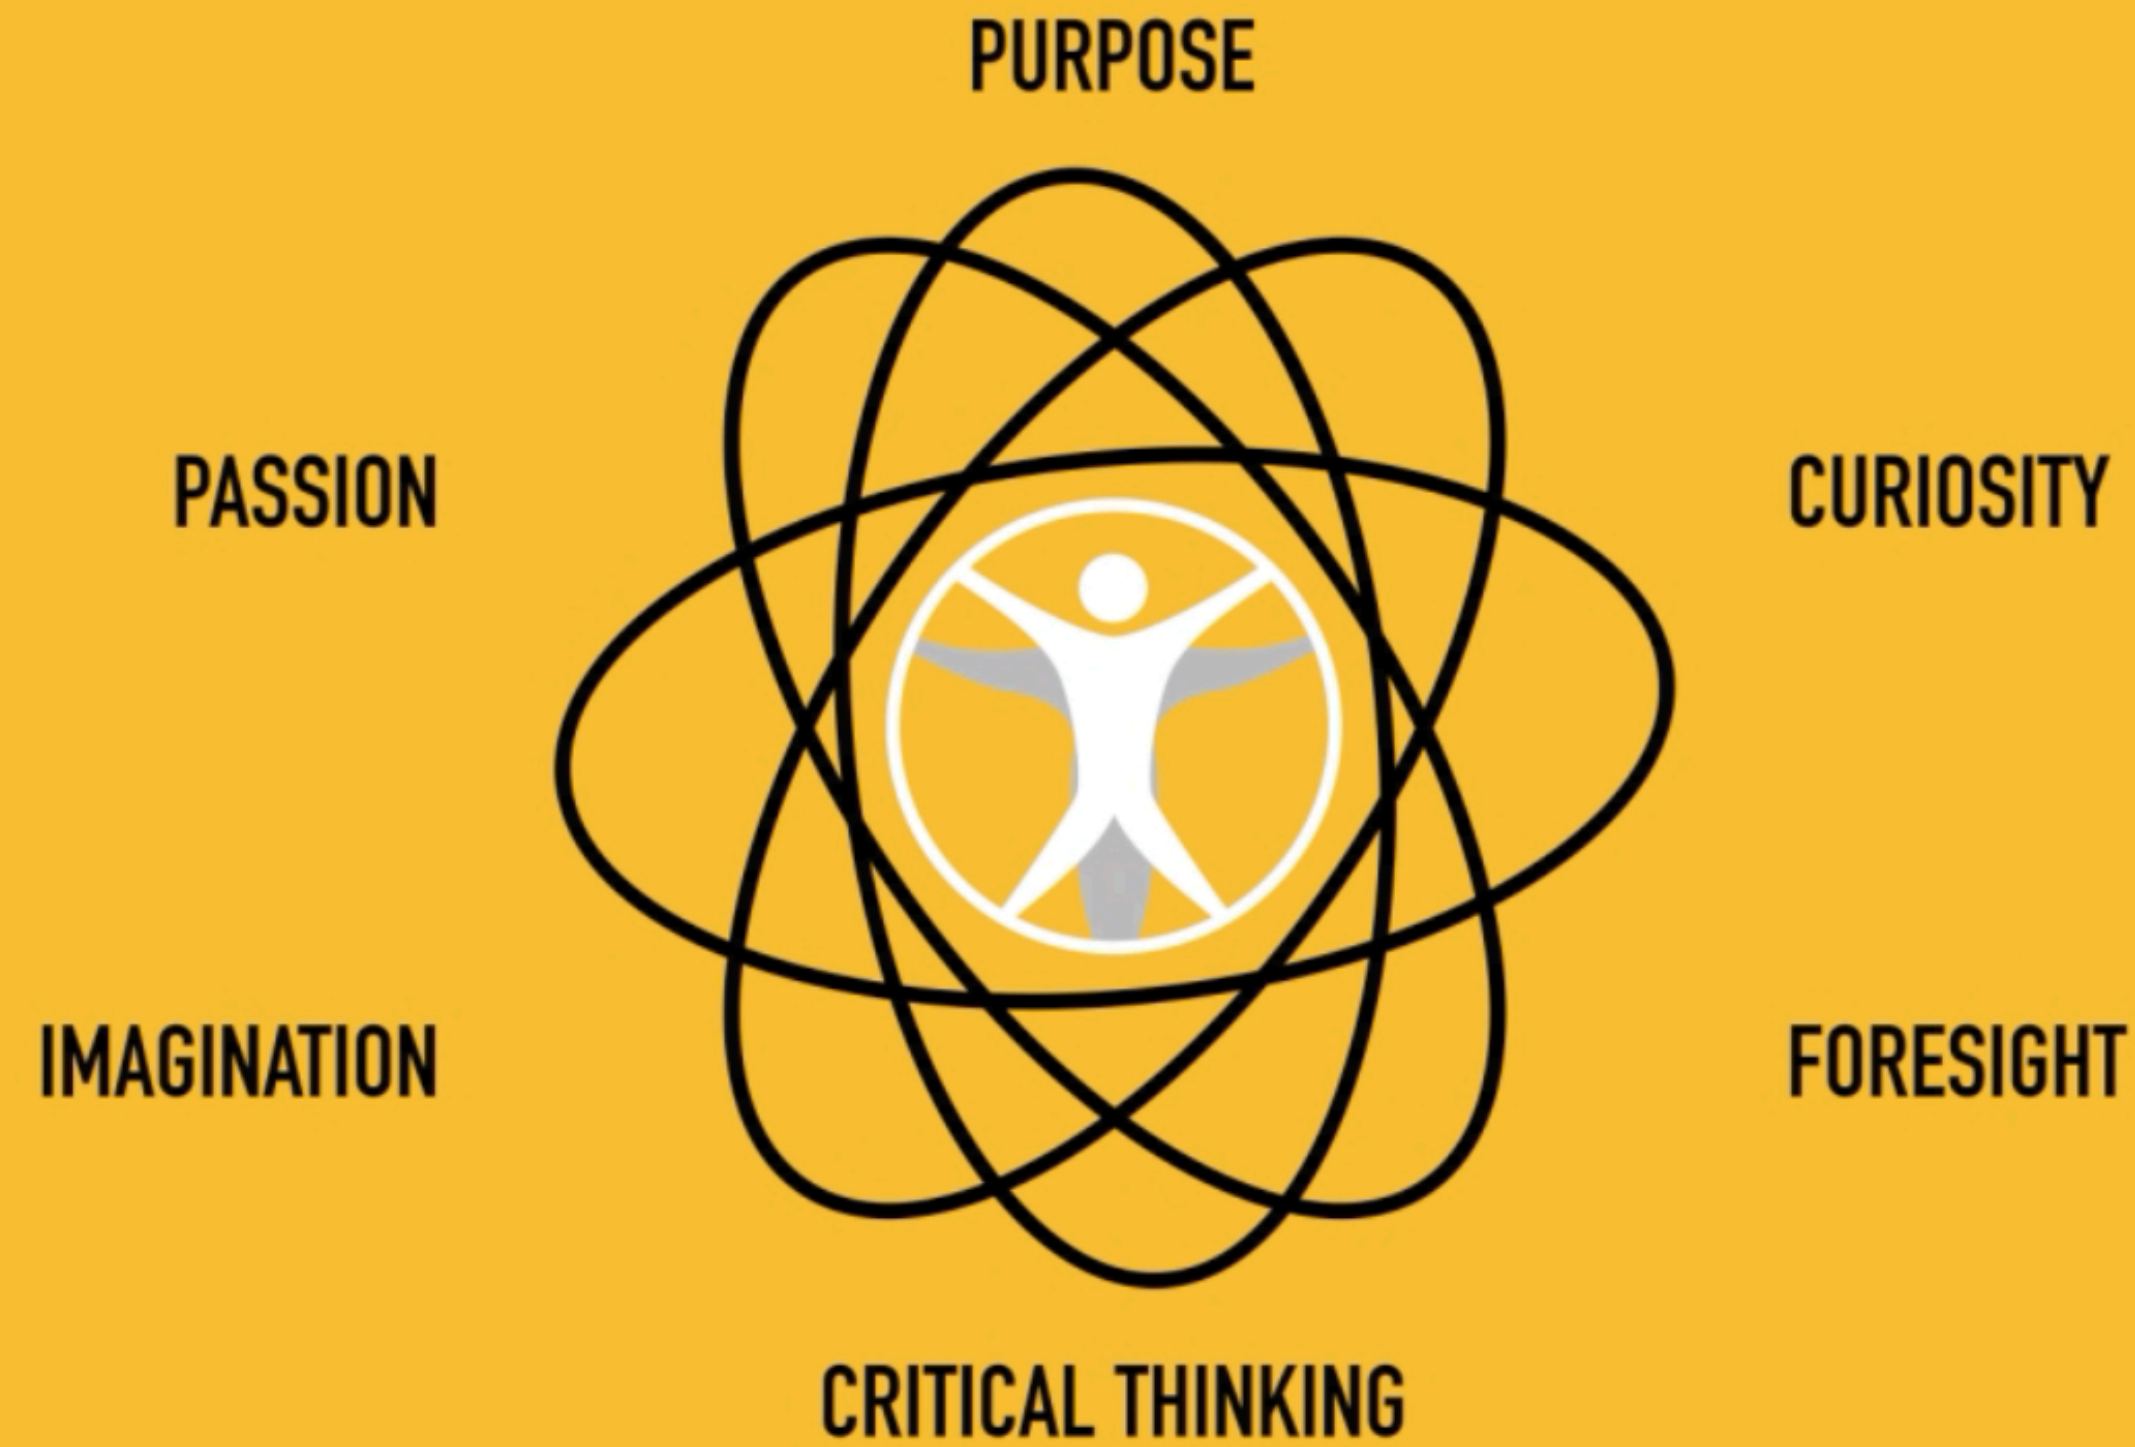

1.  be social
be neficial
2.  avoid creating or
reinforcing unfair bias
3.  be built and
tested for safety
4.  be accountable
to people
5.  incorporate privacy
design principles
6.  uphold high standards
of scientific excellence
7.  be made available for
uses that accord with
these principles

Invest as much time and money in HUMANITY (relationships, EQ, new skills, wisdom, foresights, thought-leadership, trust, brand and ethics) as you invest in TECHNOLOGY

The Future: awesome humans on-top of amazing technology
