Humanity Technology

Our world will change more in the next
20 years than in the previous 300 years.

It could be heaven or it could be hell (#hellven)

TECHNOLOGY HAS NO ETHICS

Contract for the Web

CORE PRINCIPLES

The web was designed to bring people together and make knowledge freely available. Everyone has a role to play to ensure the web serves humanity. By committing to the following principles, governments, companies and citizens around the world can help protect the open web as a public good and a basic right for everyone.

GOVERNMENTS WILL

Ensure everyone can connect to the internet so that anyone, no matter who they are or where they live, can participate actively online.

Keep all of the internet available, all of the time so that no one is denied their right to full internet access.

Respect people's fundamental right to privacy so everyone can use the internet freely, safely and without fear.

COMPANIES WILL

Make the internet affordable and accessible to everyone so that no one is excluded from using and shaping the web.

Respect consumers' privacy and personal data so people are in control of their lives online.

Develop technologies that support the best in humanity and challenge the worst so the web really is a public good that puts people first.

CITIZENS WILL

Be creators and collaborators on the web so the web has rich and relevant content for everyone.

Build strong communities that respect civil discourse and human dignity so that everyone feels safe and welcome online.

Fight for the web so the web remains open and a global public resource for people everywhere, now and in the future.

Talk of AI and ethics is on the rise

Quarterly news mentions of ("AI OR artificial intelligence") AND "ethics" 2014 – Q3 2018

To regulate AI we need new laws, not just a code of ethics | Paul Chadwick

Paul Chadwick • Sun 28 Oct 2018 20.58 GMT

Technology is becoming all-pervasive – global regulations must be created to avoid an unhealthy concentration of power in too few hands

'Mark Zuckerberg is among a tiny group of decision-makers who are shaping a world in which humans and AI collect and use the personal information of billions of people.' Photograph: Marcio Jose

Letting tech firms frame the AI ethics debate is a mistake

Citizens and lawmakers need to be more proactive about setting the AI agenda—and doing so in a manner that includes the voices of the marginalized.

Digital Ethics: the difference between doing whatever technological progress will allow us to do, and putting human happiness and societal flourishing first at all times

We are at the **pivot point** of exponential technological change – but our **ETHICS** have not kept up!

China and North America will see biggest AI gains by 2030

Source: PwC Global Artificial Intelligence Study, 2017

AI: MACHINES THAT CAN HEAR, SEE, SPEAK, LEARN... THINK?

Intelligent Assistance (IA) will be DISRUPTIVE but AGI will be **EXISTENTIAL**

We need a global moratorium on Artificial General Intelligence (AGI)

We are building a new META-INTELLIGENCE

Security? Data Protection? Privacy? Digital Rights? Sustainability?
Governance? Accountability? Regulation? Social Contract? Ethics? Values?

We are building a new META-INTELLIGENCE

“Technology can do great things, but it does not WANT to do great things. It does not want anything.”

Tim Cook, CEO, Apple October 25 2018

If?

How?

Why?

Who?

Not sustainable

Not sustainable

Not sustainable

The externalities of exponential technological growth must be INCLUDED in the digital economy, as well!

The more we connect the more we must protect what makes us human

For now the biggest danger is not that machines will eliminate us but that we become too much like them

Europe needs to adopt a holistic, future-ready mindset: 50% STEM and 50% HECI!

Science
