Covid-19 is nature's wake-up call to complacent civilisation

Is the Coronavirus Shaping the Future of How We Work?

There is already a sense that in the Golden State it is creating an inflection point of the same significance as World War II.

THE GREAT TRANSFORMATION

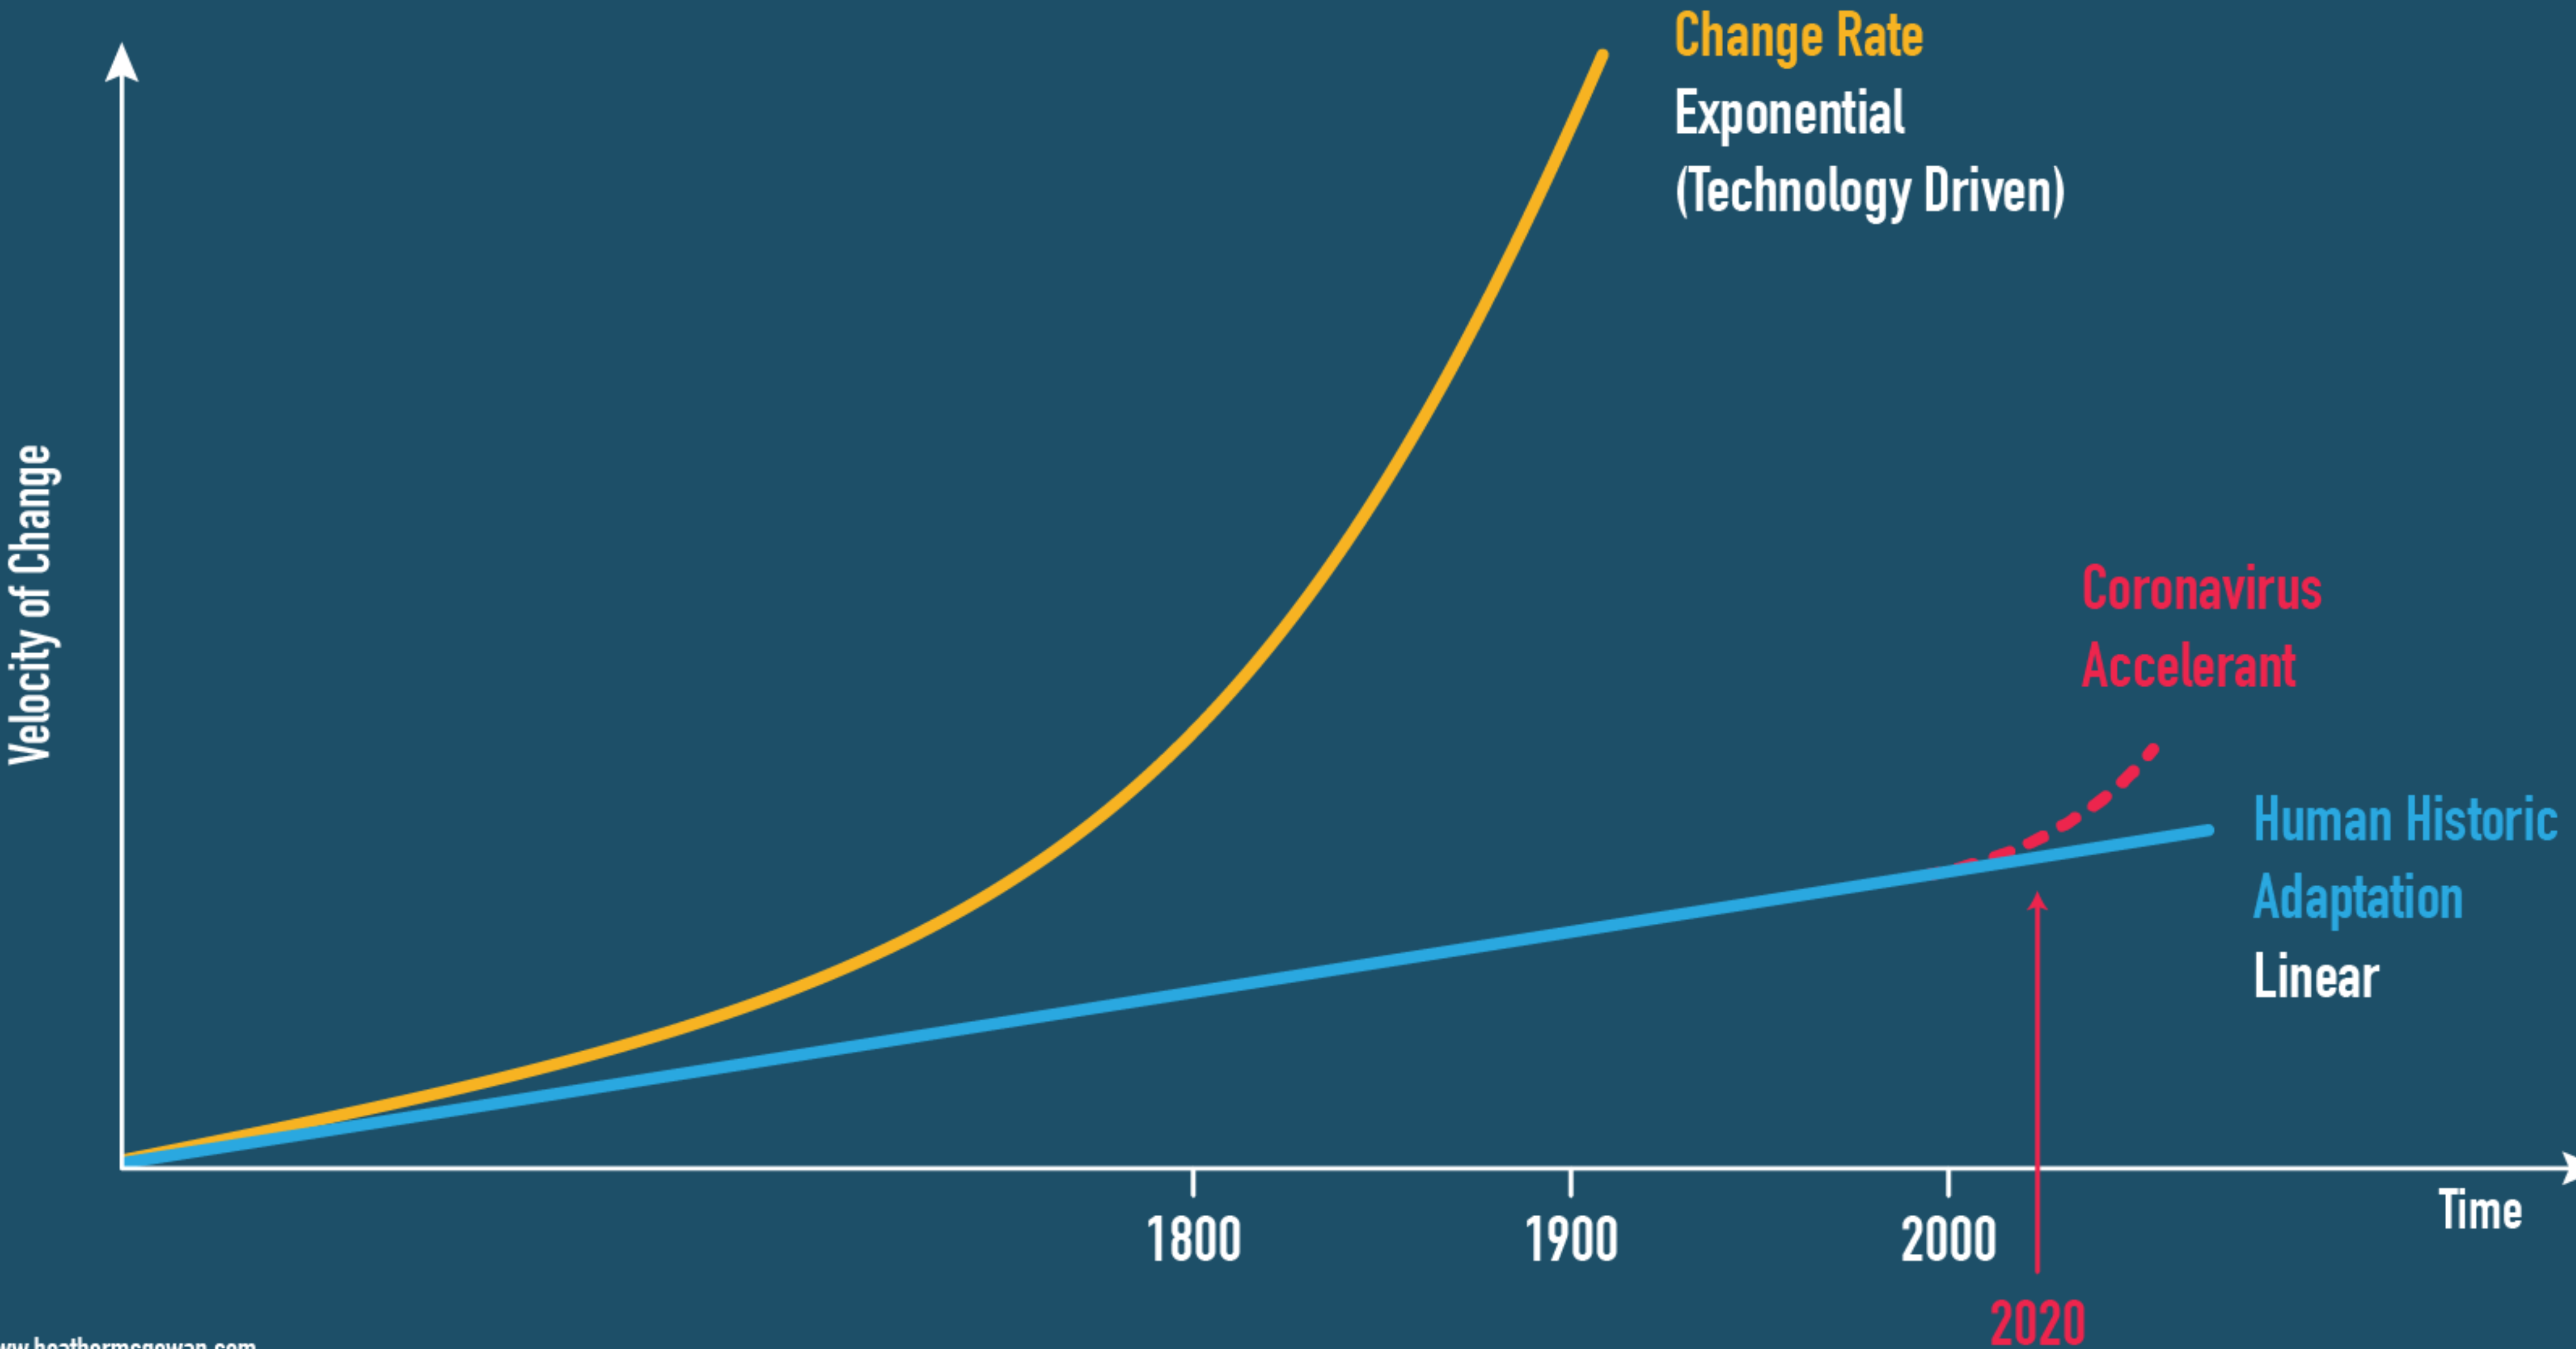

Coronavirus crisis shows Big Tech for what it is — a 21st century public utility

CORONAVIRUS ACCELERANT: SPEEDS OUR DIGITAL (HUMAN) TRANSFORMATION

A huge number of new jobs
(OCCUPATIONS) will emerge
from this coming dramatic shift to a
sustainable ecosystem: energy, food,
healthcare, transportation, agriculture...

We will see similar job-explosions
in bio-sciences, healthcare, social
services and public media (yes!)
But all depends on **FUNDING**.

The CoronaDepression is a global shift in consciousness that will totally redefine us (WORK included)

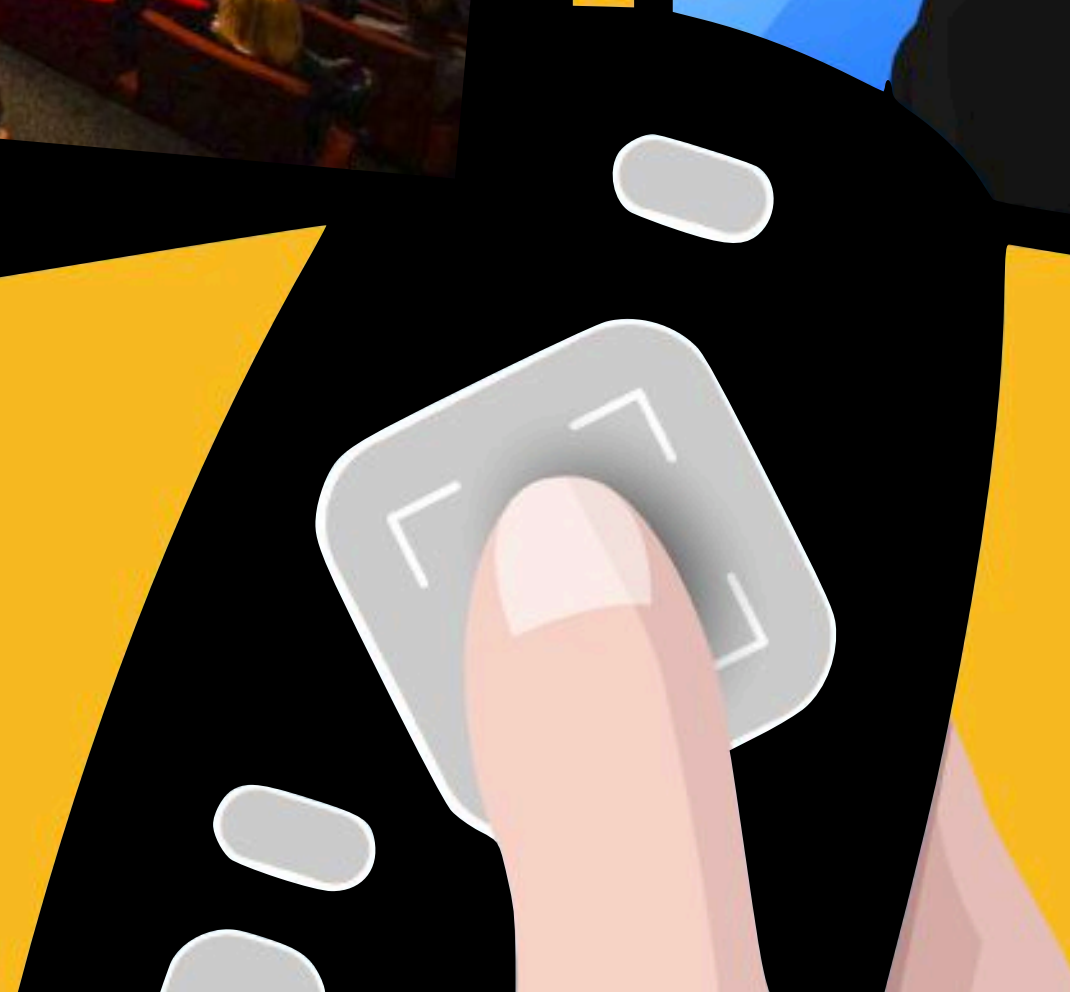

It's totally ok to work from home – but many jobs will need to adapt to that

The gig economy is exploding (but we will need new social security structures)

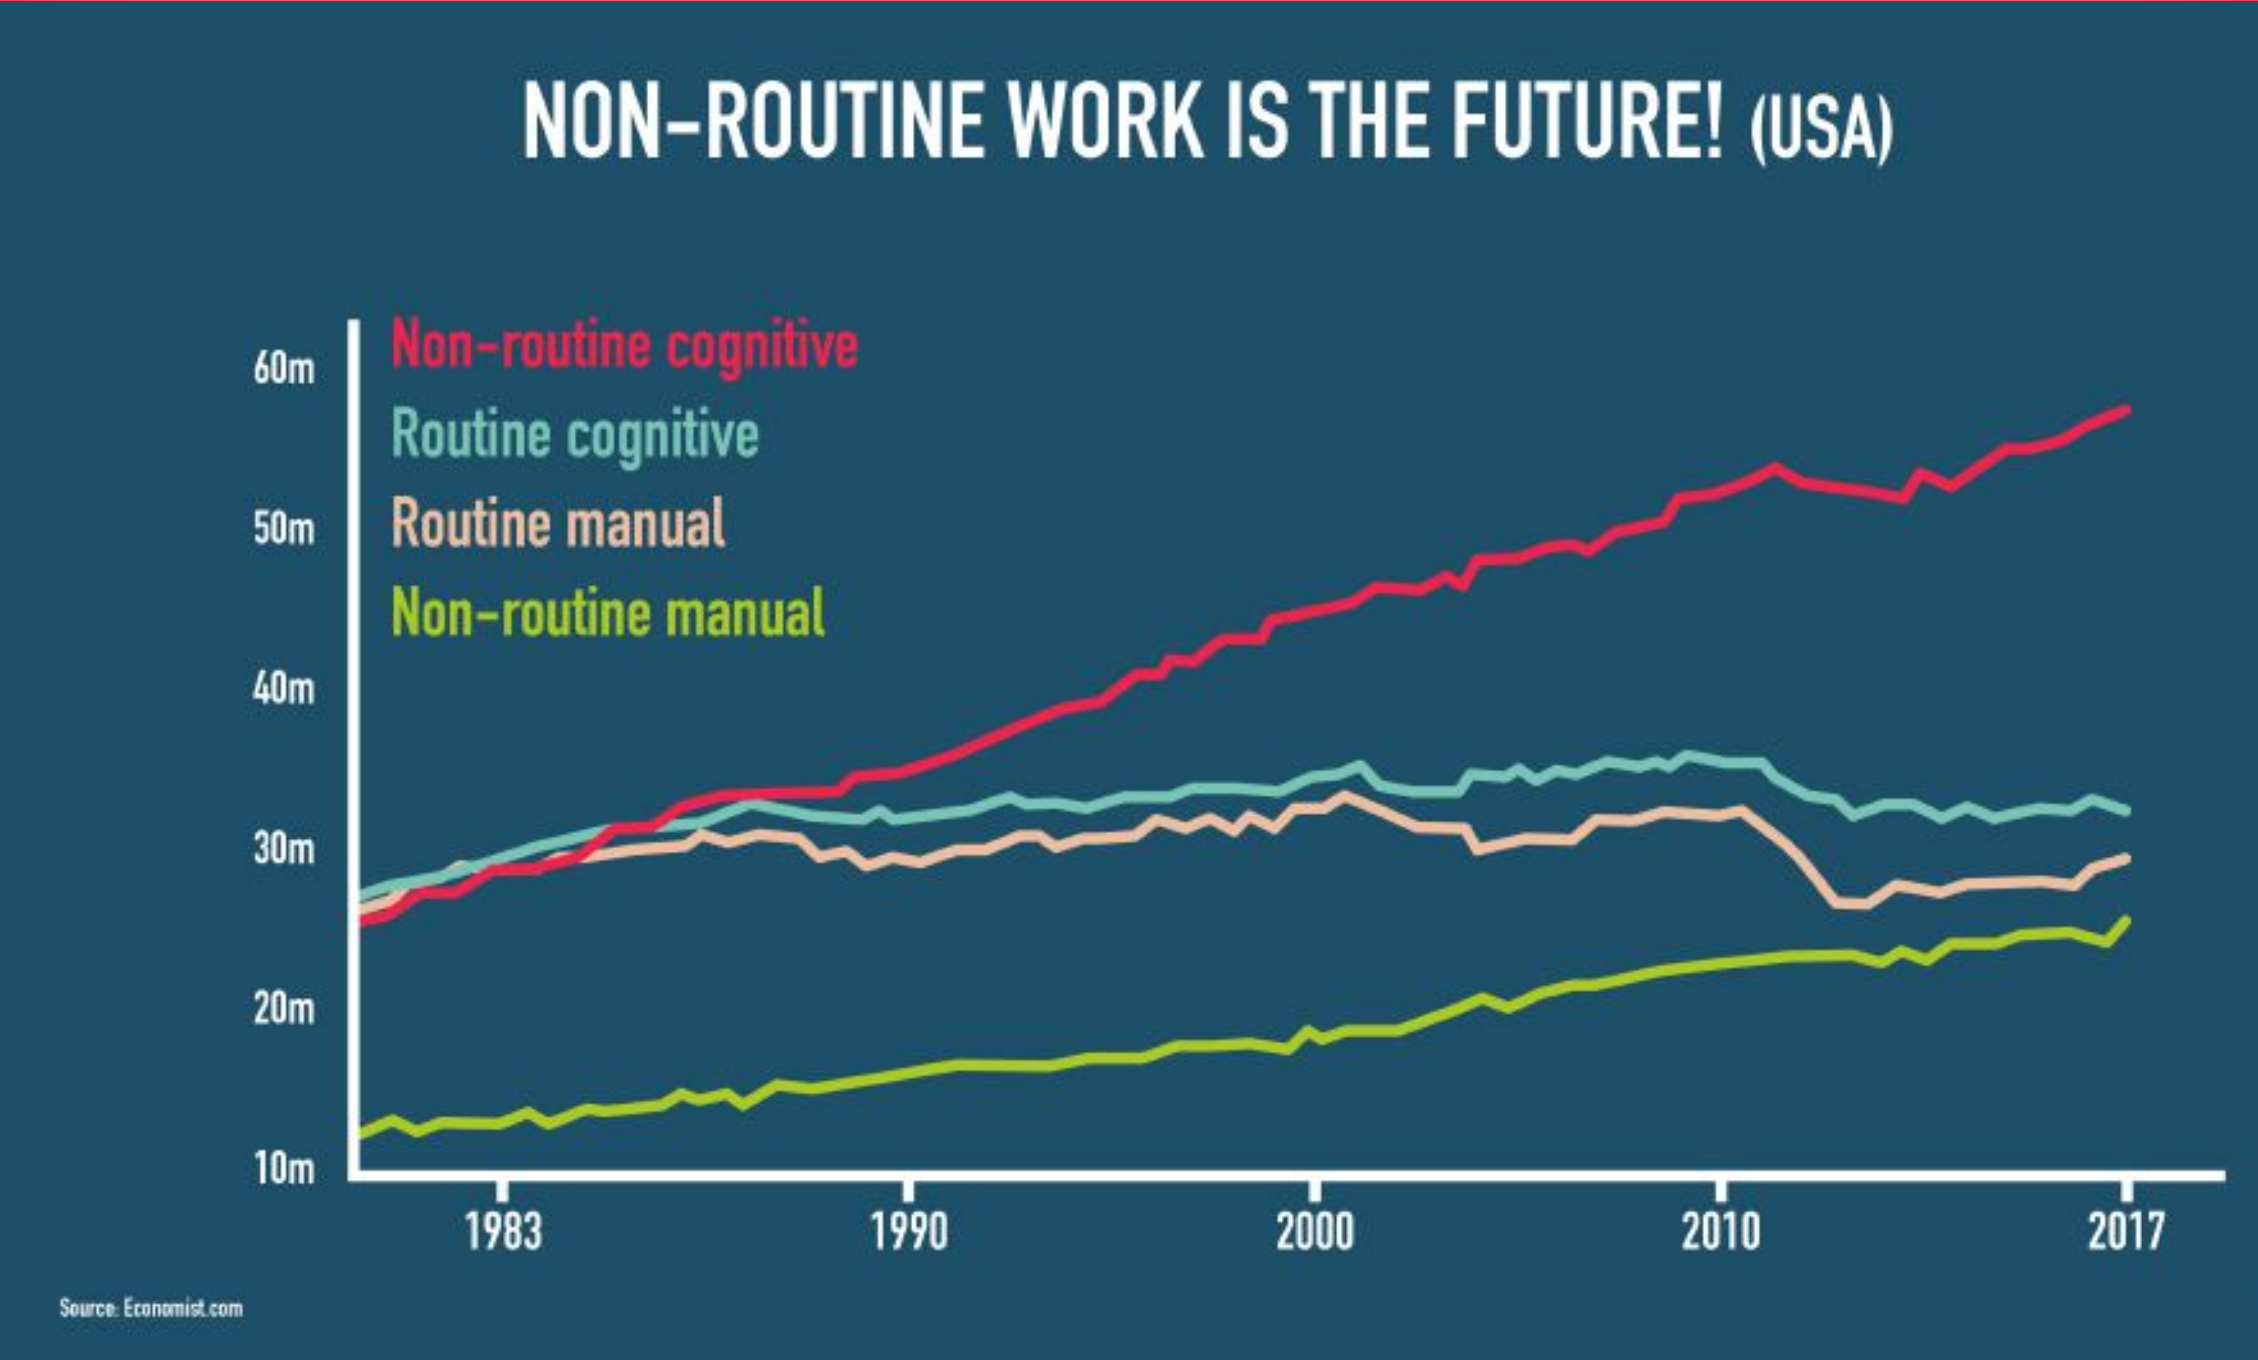

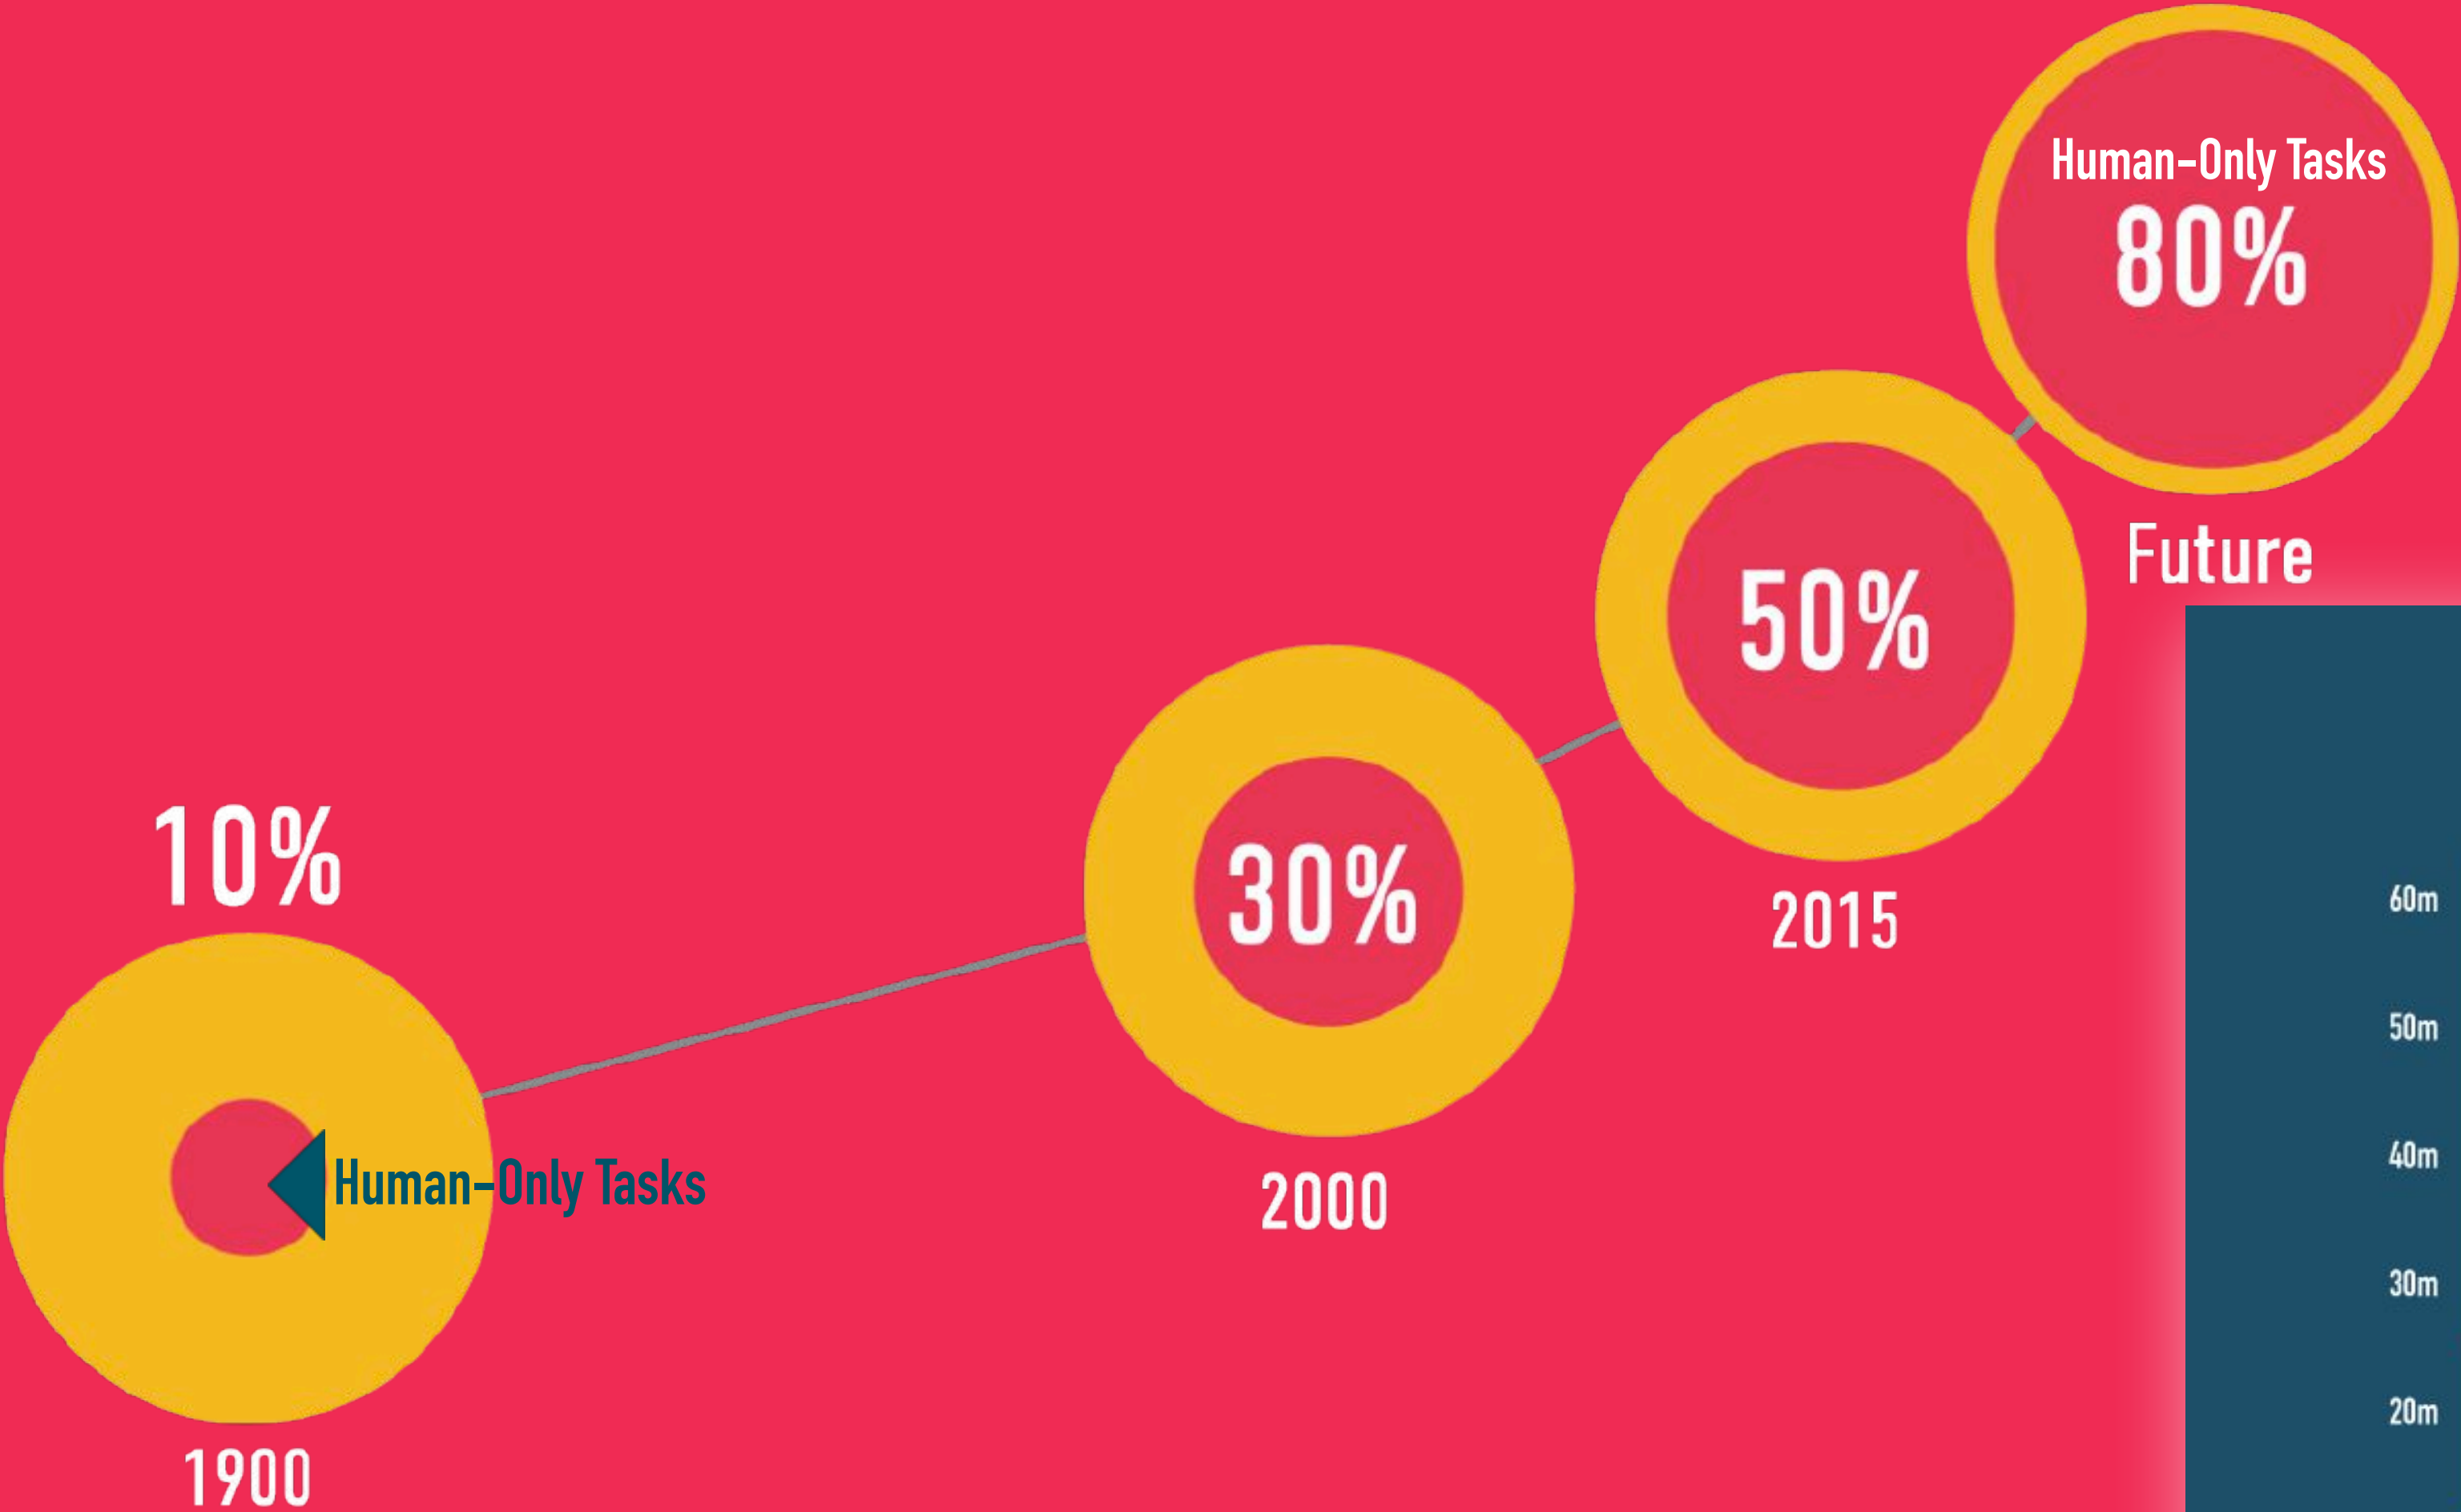

Life-long learning and constant studying is becoming the new normal (and all is online!)

Cities and transportation will look entirely different soon (local in real-life, but digitally global)

Failure to adapt means failure to exist

As machines become more intelligent and take over most routines, HUMAN-ONLY attributes will become invaluable *

In a world fuelled by amazing technology we can and must to become MORE human, not less

EMOTIONS

IMAGINATION

VA

CONSCIOUSN

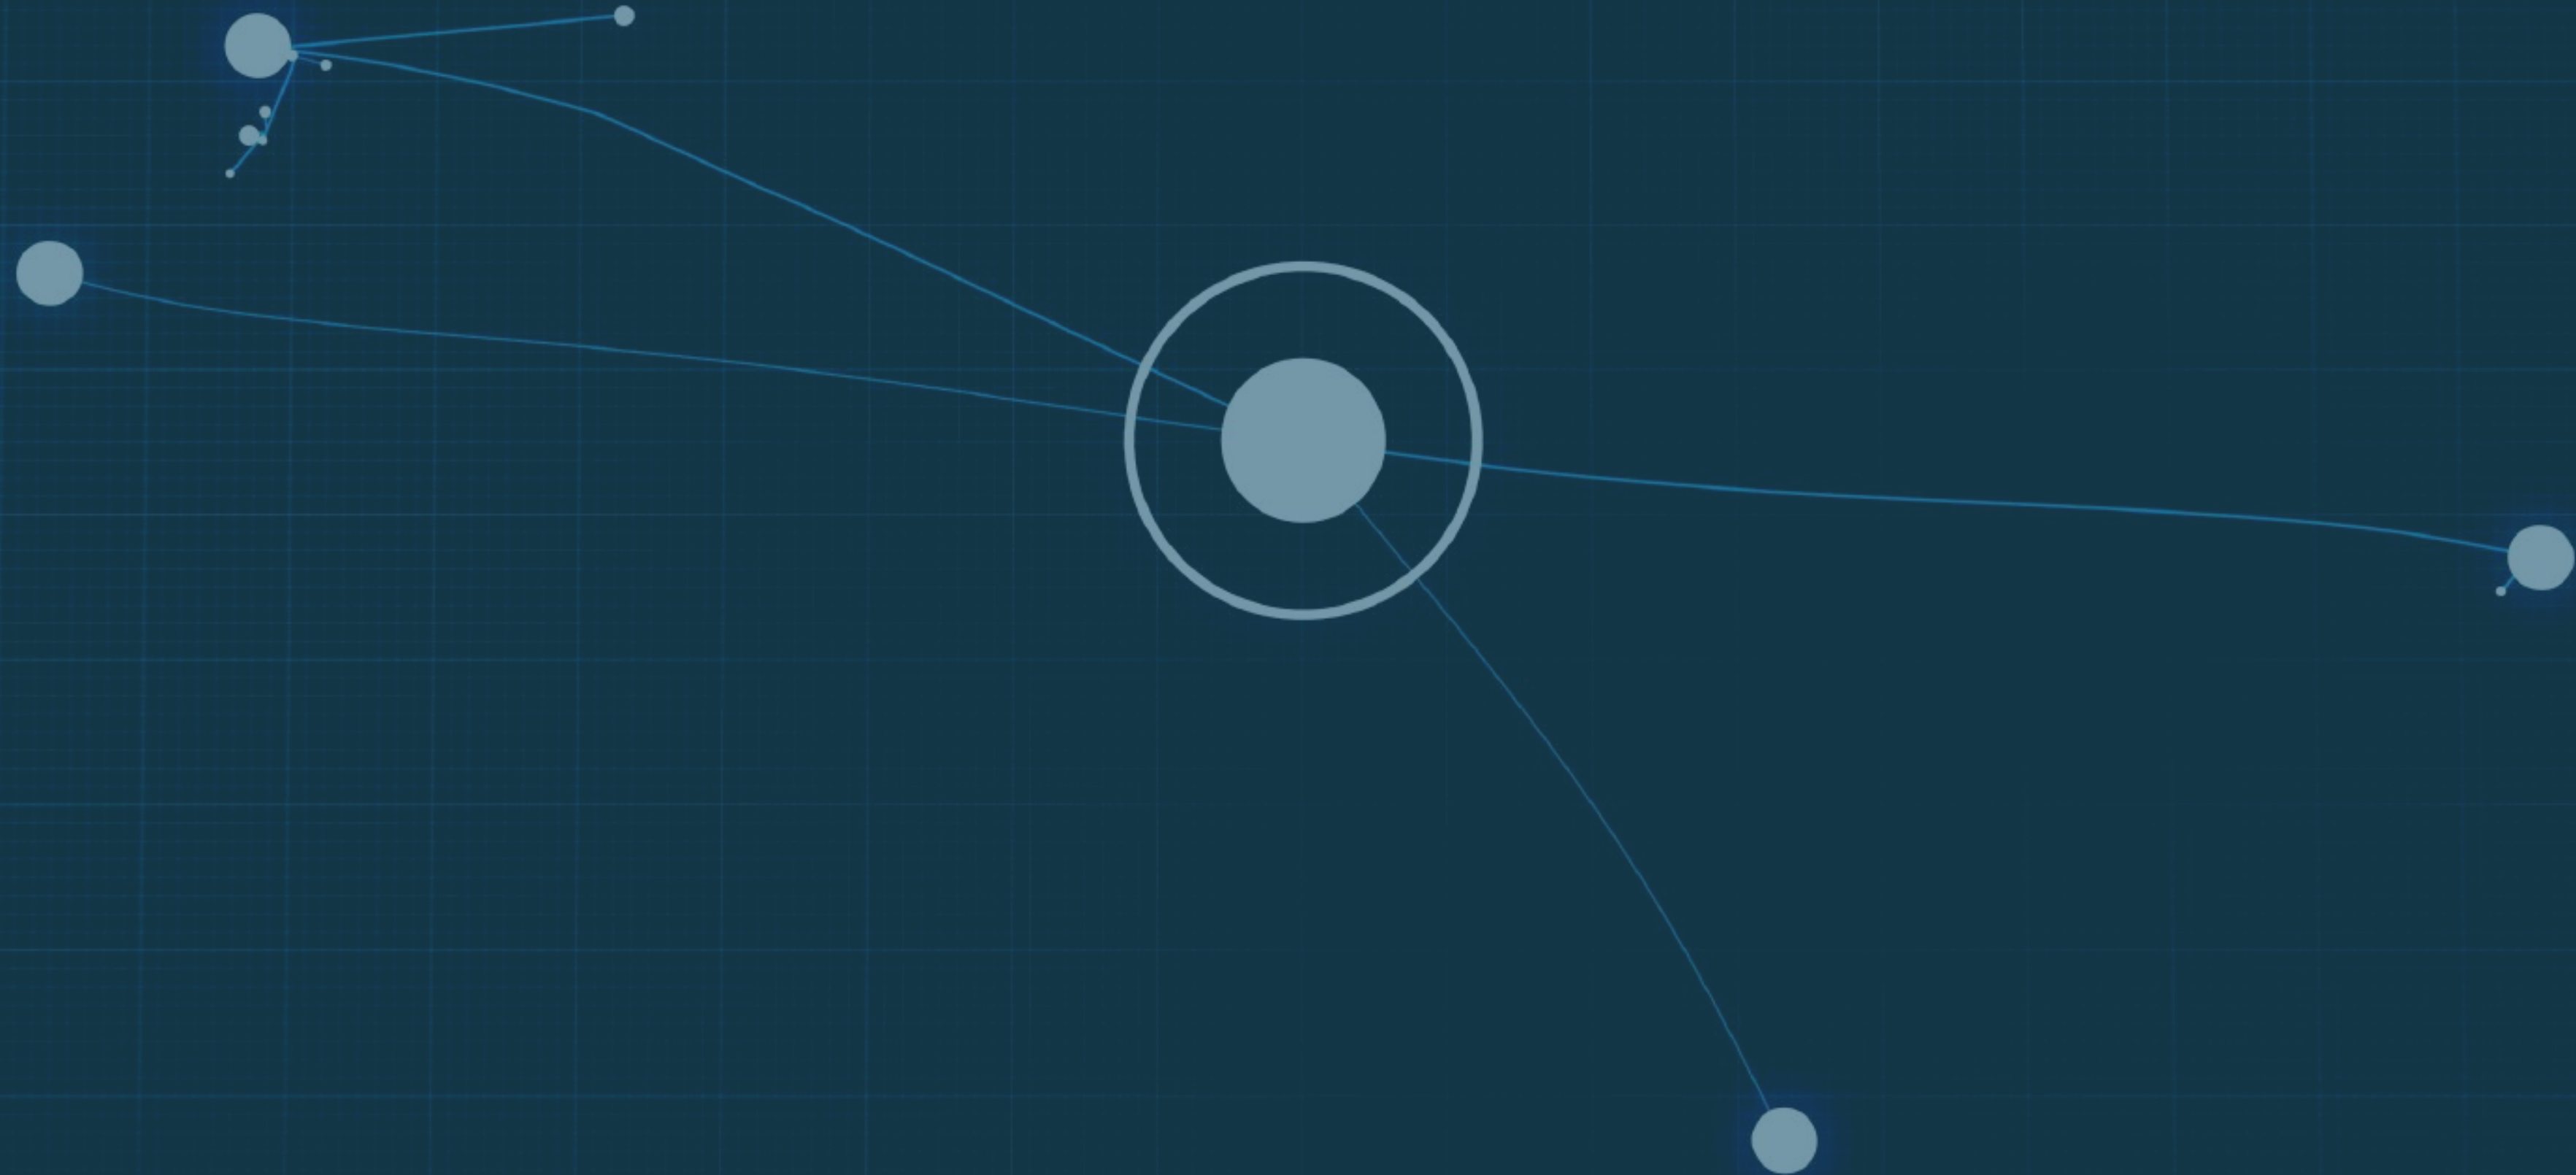

It could be heaven or it could be hell – **EVERYTHING** depends on wise governance and foresight!

What kind of world do we want? Will Europe take the lead in the #postcoronafuture?

Will we see a #newrenaissance in the USA?

The Future is better than we think!
